FUND SUMMARY

Investment Objective: The Fund seeks capital appreciation and income.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and/or your family invest, or agree to invest in the future, at least \$25,000 in the Fund. More information about these and other discounts is available from your financial professional and in **How to Purchase Shares** on page 13 of this Prospectus and in **Purchase, Redemption and Pricing of Shares** on page 42 of the Statement of Additional Information.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	5.75%	None	None
Maximum Deferred Sales Charge (Load)	None	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions	None	None	None
Redemption Fee	None	None	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)			
Management Fees	1.50%	1.50%	1.50%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	None
Other Expenses	13.26%	13.26%	13.26%
Interest Expense ⁽¹⁾	1.16%	1.16%	1.16%
Remaining Other Expenses	12.10%	12.10%	12.10%
Acquired Fund Fee and Expenses ⁽²⁾	0.03%	0.03%	0.03%
Total Annual Fund Operating Expenses	15.04%	15.79%	14.79%
Fee Waiver and/or Expense Reimbursement ⁽³⁾	(12.10)%	(12.10)%	(12.10)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expenses Reimbursement	2.94%	3.69%	2.69%

- (1) Interest Expense reflects interest charged to the Fund in connection with its option transactions and certain margin/collateral requirements of the options counterparty. This expense does not reflect the interest received by the Fund for the Fund's collateral pledged for such transactions.
- (2) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund's financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.
- (3) Princeton Fund Advisors, LLC has contractually agreed to waive management fees and to make payments to limit Fund expenses, until at least January 31, 2026 so that the total annual operating expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with investments including investments in other collective investment vehicles or derivative instruments (for example options fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; (vii) expenses incurred in connection with any merger or reorganization; and (viii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) do not exceed 1.75%, 2.50% and 1.50% of average daily net assets attributable to Class A, Class C and Class I shares, respectively. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees were waived or reimbursed) if such recoupment can be achieved within the lesser of the foregoing expense limits or the then-current expense limits. This agreement may be terminated only by the Board of Trustees on 60 days written notice to Princeton Fund Advisors, LLC.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, and that the advisor's fee waiver is only in effect for the term of the waiver. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

Class	1 Year	3 Years	5 Years	10 Years
Class A	\$855	\$3,465	\$5,578	\$9,260
Class C	\$371	\$3,235	\$5,514	\$9,378
Class I	\$272	\$3,009	\$5,237	\$9,156

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the fiscal year ended April 30, 2024, the Fund's portfolio turnover rate was 0% of the average value of its portfolio.

Principal Investment Strategies:

The Fund intends to utilize two principal investment strategies: 1) a premium collection strategy involving sale or purchase of put options on the S&P 500 Index and 2) investing in fixed income securities. Under normal market conditions, the adviser intends to allocate between 30% to 100% of the Fund's net assets to the premium collection strategy at any given time.

In pursuing its premium collection strategy, the Fund purchases and sells put options on the S&P 500 Index. A put option is a contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a pre-determined price within a specified time frame. The Fund receives premiums for the put options it sells and pays premiums for the put options it purchases. The Fund will realize a gain from its premium collection strategy to the extent that the amount of premium received by the Fund for selling a particular put option is greater than the amount of premium paid by the Fund for purchasing an offsetting put option. The adviser utilizes quantitative models that allow it to determine what it believes is the probability of certain put options expiring worthless; the sale of a put option is typically done at a price that the adviser believes have a 99.5% or greater probability of the puts sold expiring worthless. These models utilize a formula to calculate probabilities by utilizing market data such as real and/or implied volatility as measured by the CBOE Volatility Index ("VIX"), time to expiration for the option contracts, and the current value of the S&P 500 Index to determine the probability an option will expire worthless. The trades for the Fund are put spreads because an offsetting position is taken for each option contract. Accordingly, the potential risk of the Fund's put option positions is well defined. It is desirable that the underlying index remains in a relatively narrow trading range from the time the Fund opens the position until the options expire.

The adviser will seek to further mitigate risk and maximize Fund profits by continuing its proprietary quantitative analysis and monitoring the trade during the term of the contracts; and may close a trade early if it determines 1) the probability of the put or call option expiring worthless declines below a defined probability level (typically 85% or higher), 2) it determines it can close the trade for minimum cost, or 3) it can close the trade early and achieve the target profit objective for such trade.

The Fund also allocates a portion of its assets to a fixed income strategy. In pursuing its fixed income strategy, the Fund may invest in fixed income securities of any maturity. Such fixed income investments will be rated investment grade by Moody's (Baa3 or better) or another rating agency at the time the investment is made. The adviser expects to primarily execute the Fund's fixed income strategy by investing in U.S. Treasury bonds. The Fund may also invest in exchange traded funds ("ETFs"), money market funds or open-end mutual funds that primarily invest in investment grade fixed income securities.

The Fund is required to pledge collateral for the option trades and it will hold cash, treasury bills, money market instruments or other fixed-income securities as collateral for all such options trades. The Fund's custodian will segregate such collateral for the benefit of the counterparty. Therefore, the Fund must typically maintain a large percentage of cash and cash equivalents within the Fund. The amount collected by the Fund when opening a trade represents the maximum profit (or premium) for the position.

The adviser considers a variety of factors in determining whether to sell a fixed income investment: changes in market condition, changes in credit quality, changes in prospects for alternative investment possibilities or return opportunities for other fixed income instruments, current return expectation of such security, any changes in interest rates, liquidity of the security, and cash needs of the Fund. If a fixed income investment is downgraded after purchase the adviser may, but is not obligated to, dispose of such investment.

The Fund is "diversified" for purposes of the Investment Company Act of 1940, as amended (the "1940 Act").

The Fund may also invest a substantial portion of its assets in U.S. Treasury bonds, high-quality short-term debt securities and money market instruments, to maintain liquidity for shareholder redemptions, or to respond to adverse conditions.

Distribution Policy: The Fund pays quarterly distributions on Fund shares at a target rate that represents an annualized payout of approximately 2.0% on the Fund's per-share net asset value on the date of a distribution's declaration. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. The Fund will provide disclosures, with each quarterly distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) capital gains and (3) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes.

Principal Investment Risks: *As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund's net asset value and performance.*

The following risks may apply to the Fund's investments:

- *Credit Risk:* There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes.
- *Derivatives Risk:* The Fund uses an options strategy. Options involve risks possibly greater than the risks associated with investing directly in securities including leverage risk, tracking risk (the derivatives may not track the underlying securities) and certain options involve counterparty default risk.
- *Distribution Policy Risk:* The Fund pays quarterly distributions on Fund shares at a target rate that represents an annualized payout of approximately 2.0% on the Fund's per-share net asset value on the date of a distribution's declaration. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. The Fund will provide disclosures, with each monthly distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) capital gains and (3) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes.
- *Fixed Income Risk:* The Fund may invest directly in fixed income securities, or indirectly through ETFs, money market funds, or mutual funds which invest primarily in fixed income securities. The value of the Fund's investments in fixed income securities, whether via direct investment or through Underlying Funds, will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.
- *Hedging Risk:* Because the Fund hedges certain investments, the Fund may not benefit from upswings in the market to the same extent it would if it utilized a different investment strategy. The Fund does not expect to participate fully in positive markets because its premium collection options strategy is not designed to track the market.
- *Leverage Risk:* Using options to increase the Fund's combined long and short exposure creates leverage, which can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price.
- *Liquidity Risk:* Liquidity risk is the risk that you might not be able to buy or sell investments quickly for a price that is close to the true underlying value of the asset. When a bond is said to be liquid, there's generally an active market of investors buying and selling that type of bond. Treasury bonds and larger issues by well known corporations are generally very liquid. But not all bonds are liquid; some trade very infrequently, which can present a problem if you try to sell before maturity—the fewer people that are interested in buying the bond you want to sell, the more likely it is you'll have to sell for a lower price, possibly incurring a loss on your investment. Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations. Liquidity risk can be greater for bonds that have lower credit ratings (or were recently downgraded), or bonds that were part of a small issue or sold by an infrequent issuer.
- *Market and Geopolitical Risk:* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change and climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s)

could have a significant adverse impact on the value and risk profile of the Fund. It is not known how long any future impacts of the significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions you could lose your entire investment.

- *Management Risk:* The advisor's judgments about the long-term returns the Fund may generate through its principal investment strategies may prove to be incorrect and may not produce the desired results. Additionally, the advisor's judgments about the allocation of Fund's assets between the principal investment strategies and potential performance of each may also prove incorrect and may not produce the desired results. The Fund is not designed to participate in or be correlated to overall movements of the markets; therefore, the Fund may not benefit from positive equity markets, or experience the same type of positive returns as some other funds in a positive equity market environment. The Fund may also experience losses in a negative equity market, and such losses may be amplified if the options strategy is not successful. The Fund's principal investment strategies may not achieve their intended results and each strategy could negatively impact the Fund.
- *Market Volatility Risk:* Overall equity, fixed income, and derivatives market risks may affect the value of the Fund. While the Fund is not designed to be correlated with the markets in general, dramatic or abrupt volatility within the market would negatively impact the Fund's premium collection options strategy, causing significant losses for the Fund. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities and derivatives markets. When the value of the Fund goes down, your investment in the Fund decreases in value and you could lose money.
- *Non-Correlation Risk:* Although the Fund will invest in options on the S&P 500 Index, the Fund is not designed to track the returns of such index. The Fund's return may not match the return of the S&P 500 Index because it is not investing directly in the equity securities that comprise such index. Also, the Fund incurs operating expenses not applicable to the index, and incurs costs in buying and selling securities.
- *Options Risk:* Options are subject to changes in the underlying securities or index of securities on which such instruments are based. There is no guarantee that the Fund's options strategy will be effective or that suitable transactions will be available. Volatility in the value of the Fund's option positions could result in significant losses for the Fund. The Fund's option strategy's profit potential is limited to the net premium received when entering the trades. The potential for loss is an amount equal to the 1) difference between the strike price of the long put and the strike price of the short put, plus 2) any commissions paid. Maximum loss under the option strategy occurs from the put trade, when the underlying price is less than or equal to the strike price of the short put. A portion of any option premiums may be treated as short-term capital gains and when distributed to shareholders are usually taxable as ordinary income, which may have a higher tax rate than long-term capital gains for shareholders holding Fund shares in a taxable account.
- *Underlying Funds Risk:* The Fund may invest in ETFs, money market funds, or mutual funds that invest primarily in fixed income securities. Underlying Funds are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in an Underlying Fund and may be higher than other mutual funds that only invest directly in stocks and bonds. ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. The market value of the ETF shares may differ from their net asset value. Underlying Funds in which the Fund may invest may be subject to different risks, investment strategies and policies than those of the Fund.

Performance: The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Class I shares of the Fund for each full calendar year since the Fund's inception. Although returns for Class A shares are similar to the returns of Class I shares because the classes are invested in the same portfolio of securities and underlying funds, returns for Class A shares are different from Class I shares due to differences in fees, which are not presented in the bar chart. The performance table compares the performance of the shares of the Fund over time to the performance of a broad-based securities market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information will be available at no cost by visiting www.princetonadaptivepremiumfund.com or by calling 1-888-868-9501.

Class I Annual Total Return for Calendar Years Ended December 31

Best Quarter:	4th Quarter 2023	1.61%
Worst Quarter:	1 st Quarter 2023	1.21%

The Fund's Class I year-to-date return as of June 30, 2024 was 2.81%.

Performance Table
Average Annual Total Returns
(For periods ended December 31, 2023)

	One Year	Since Inception (9/23/2023)
Class I shares		
Return before taxes	5.83%	5.48%
Return after taxes on distributions	4.14%	3.83%
Return after taxes on distributions and sale of Fund shares	3.69%	3.62%
Class A shares		
Return before taxes with sales charge ⁽¹⁾	(1.49)%	(0.23)%
Return before taxes without sales charge	4.51%	4.53%
S&P 500 Total Return Index*	26.29%	24.35%

(1) Returns for Class A shares include the maximum sales charge of 5.75%.

*The S&P 500 Total Return Index is a widely accepted, unmanaged index of U.S. stock market performance which does not take into account charges, fees, taxes and other expenses. Investors may not invest in the index directly.

After-tax returns were calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or Individual Retirement Accounts (IRAs). After-tax returns for Class A shares are not shown and would differ from those of Class I shares. Returns for Class A shares include the maximum sales charge of 5.75%.

Investment Adviser: Princeton Fund Advisors, LLC

Portfolio Managers: Greg Anderson, Manager and President of the adviser, John L. Sabre, Manager and Chief Executive Officer of the adviser, and Zachary Slater, Vice President of the adviser, have each served as a portfolio manager of the Fund since its inception in June 2022. Each portfolio manager is jointly and primarily responsible for the day-to-day management of the Fund.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. The minimum initial investment in Class A, Class C and Class I shares is \$2,500, \$2,500 and \$100,000, respectively. There is a minimum amount of \$100 for subsequent investment in any share class. These minimums may be waived at the discretion of the Fund.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund, the adviser or their related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective:

The Fund seeks capital appreciation and income. The Fund's investment objective may be changed by the Board of Trustees (the "Board") upon 60 days written notice to shareholders.

Principal Investment Strategies:

The adviser has been managing mutual funds since 2011 and currently manages other open-end mutual funds within the Trust, closed-end funds and a private fund. The adviser has overall supervisory responsibilities for the general management and investment of the Fund's investment portfolio.

The Fund intends to utilize two principal investment strategies: 1) a premium collection strategy involving sale or purchase of put options on the S&P 500 Index and 2) investing in fixed income securities. Under normal market conditions, the adviser intends to allocate between 30% to 100% of the Fund's net assets to the premium collection strategy at any given time.

In pursuing its premium collection strategy, the Fund purchases and sells put options on the S&P 500 Index. A put option is a contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a pre-determined price within a specified time frame. The Fund receives premiums for the put options it sells and pays premiums for the put options it purchases. The Fund will realize a gain from its premium collection strategy to the extent that the amount of premium received by the Fund for selling a particular put option is greater than the amount of premium paid by the Fund for purchasing an offsetting put option. The adviser utilizes quantitative models that allow it to determine what it believes is the probability of certain put options expiring worthless; the sale of a put option is typically done at a price that the adviser believes have a 99.5% or greater probability of the puts sold expiring worthless. These models utilize a formula to calculate probabilities by utilizing market data such as real and/or implied volatility as measured by the CBOE Volatility Index ("VIX"), time to expiration for the option contracts, and the current value of the S&P 500 Index to determine the probability an option will expire worthless. The trades for the Fund are put spreads because an offsetting position is taken for each option contract. Accordingly, the potential risk of the Fund's put option positions is well defined. It is desirable that the underlying index remains in a relatively narrow trading range from the time the Fund opens the position until the options expire.

The adviser manages the fixed income strategy by investing a portion of the Fund's assets in U.S. Treasury bonds of any maturity, or in Underlying Funds whose investment strategy is to invest primarily in investment grade (rated BBB or higher by Standard & Poor's or Moody's) fixed income securities of any maturity, of U.S. issuers of any size, including smaller issuers. Credit quality of the issuer will be considered at the time of investment, and for Underlying Funds the adviser will invest in Underlying Funds whose principal investment strategy is to invest primarily in investment grade fixed income securities. The adviser considers a variety of factors in determining whether to sell a fixed income investment, including changes in market condition, changes in credit quality, changes in prospects for alternative investment possibilities or return opportunities for other fixed income instruments, current return expectation of such security, any changes in interest rates, liquidity of the security, and cash needs of the Fund. If a fixed income investment is downgraded after purchase, the adviser may, but is not obligated to, dispose of such investment.

The Fund intends to collect premium from the sale and purchase of put options on the S&P 500 Index. The capital gains generated by the Fund's option strategy are expected to be 60% long term capital gains and 40% short term capital gains as we believe the options are Section 1256 contracts under the Internal Revenue Code. The Fund also seeks to generate cash flow or income using a fixed income strategy.

Fund risk is monitored and mitigated in several ways. The premium collection strategy trades have defined risk: risk is controlled by the number of option contracts purchased and the time frame during which they are open, and the adviser's defined risk trade protocol (purchasing offsetting put contracts for the same contracts but at a different price). The adviser further manages overall risk of the Fund by monitoring the performance within each strategy and controlling the amount of Fund's assets that are allocated to either strategy at any given time.

The adviser believes this Fund is suitable to include in the risk portion of an investor's investment portfolio that includes equities and non-investment grade fixed income securities (commonly known as "junk bonds"). However, if you are seeking only investment grade fixed income investments, then the Fund may not be appropriate for your investment goals.

Princeton Fund Advisors, LLC's Investment Process

Portfolio design begins with the establishment of objectives for precise, quantifiable measures of risk, such as standard deviation of monthly returns. The adviser's research team combines quantitative and qualitative research in its evaluation of the strategies to be executed. The adviser then monitors strategies, as-executed, for investment performance and achievement of risk objectives. The adviser seeks to mitigate risks where possible, and manage appropriate risks for the Fund's investment objective and desired returns. The adviser has overall supervisory responsibilities for the general management and investment of the Fund's investment portfolio.

The adviser utilizes a premium collection strategy, in which the Fund may sell and purchase put option spreads on the S&P 500 Index. For example, each put spread utilizes the same type of contract, same maturity date, same number of contracts, but the put options are purchased/sold at different strike prices. When the expiration date arrives, if all options are out-of-the-money, they expire worthless and the Fund will retain the cash (premium) collected when opening the position, net of any cash (premium) paid to purchase the put positions. Under normal market conditions, the adviser intends to allocate between 50% to 100% of the Fund's net assets to this premium collections strategy at any given time, such allocation to be determined by the adviser.

The adviser utilizes quantitative models to determine the appropriate option trades, and that the adviser believes this allow them to determine the probability of certain puts expiring worthless. The adviser typically seeks to sell put options at a price that they believe has a 99.5% or greater probability that the put will expire worthless at the end of the contract period (typically one week or less). The adviser's quantitative models utilize verifiable market data such as: real and/or implied volatility as measured by VIX, time to expiration for the option contracts, mean, standard deviation and current S&P 500 Index level to determine the probability an option will expire worthless. The adviser continues its proprietary quantitative analysis during the term of the contract and if the probability of a contract expiring worthless drops below a defined probability level (typically 85% or higher), then the adviser will attempt to close the contract by buying it back, thereby attempting to minimize the amount of loss on any one trade. The adviser may also buy back a contract if the cost to do so is de minimis, or it can close the trade early and achieve its target profit objective for such trade.

Distribution Policy

The Fund pays quarterly distributions on Fund shares at a target rate that represents an annualized payout of approximately 2.0% on the Fund's per-share net asset value on the date of a distribution's declaration. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. The Fund will provide disclosures, with each quarterly distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) capital gains and (3) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes.

Principal Investment Risks:

The following risks may apply to the Fund's investments.

- *Credit Risk:* There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes. Lower credit quality may lead to greater volatility in the price of a security and in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult for the Fund to sell the security. Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings. Credit risk may also exist whenever the Fund enters into certain derivative contracts, because the counterparty may not be able or may choose not to perform under the contract. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The Fund expects the options it trades to be exchange traded, but the ability of the Fund to transact business with any one or number of counterparties or the absence of a regulated market to facilitate settlement would increase the potential for losses by the Fund.
- *Derivatives Risk:* The Fund uses options as part of its principal investment strategies. The Fund's use of such derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: government programs and policies; national and international political and economic events; changes in interest rates; inflation and deflation; and changes in supply and demand relationships. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, permit a high degree of leverage. Accordingly, a relatively small price movement could result in an immediate and substantial loss to the Fund. The use of leverage in the derivatives instruments may also cause the Fund to liquidate portfolio fixed income positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price. Because option premiums paid or received are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

- *Distribution Policy Risk:* The Fund pays quarterly distributions on Fund shares at a target rate that represents an annualized payout of approximately 2.0% on the Fund's per-share net asset value on the date of a distribution's declaration. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares. The Fund will provide disclosures, with each monthly distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) capital gains and (3) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes.
- *Fixed Income Risk:* The Fund may invest directly in fixed income securities, or indirectly through Underlying Funds whose principal investment strategy is to invest primarily in fixed income securities. When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments; or the debtor may pay its obligation later than expected, reducing the returns earned by an investment). These risks could affect the value of a particular investment by the Fund possibly causing the Fund's share price and returns to be reduced and fluctuate more than other types of investments.
- *Hedging Risk:* The Fund's options strategy utilizes hedging. Because the Fund hedges certain investments, the Fund may not benefit from upswings in the market to the same extent it would if it utilized a different investment strategy. The Fund does not expect to participate fully in positive markets because its premium collection options strategy is not designed to track the market. There can be no assurance that the Fund's hedging strategy will reduce risk or that hedging transactions will be either available or cost effective. The Fund is not required to use certain hedging techniques described in this prospectus and may choose not to do so.
- *Leverage Risk:* Using derivatives to increase the Fund's combined long and short position exposure creates leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of mutual funds that do not use such techniques. The Fund will utilize leverage to the extent leverage is implicit in the options strategy. The amount of leverage utilized will be within the limits established for RICs.
- *Liquidity Risk:* The Fund may be subject to liquidity risk. Liquidity risk is the risk that you might not be able to buy or sell investments quickly for a price that is close to the true underlying value of the asset. When a bond is said to be liquid, there's generally an active market of investors buying and selling that type of bond. Treasury bonds and larger issues by well-known corporations are generally very liquid. But not all bonds are liquid; some trade very infrequently, which can present a problem if you try to sell before maturity—the fewer people there are interested in buying the bond you want to sell, the more likely it is you'll have to sell for a lower price, possibly incurring a loss on your investment. Liquidity risk can be greater for fixed income securities that were recently downgraded, or fixed income securities that were part of a small issue or sold by an infrequent issuer.
- *Management Risk:* The net asset value of the Fund changes daily based on the performance of the securities and derivatives in which it invests. The adviser's judgments about the attractiveness, value and premium to be generated by or potential appreciation of particular investment strategy or securities in which the Fund invests (long or short) may prove to be incorrect and may not produce the desired results. The Fund is not designed to participate in or be correlated to overall movements of the markets; therefore the Fund may not benefit from positive equity markets, or experience the same type of positive returns as some other funds in a positive equity market environment. The Fund may also experience losses in a negative equity market, and such losses may be amplified if the options strategy is not successful.
- *Market and Geopolitical Risk:* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change or climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund. . It is not known how long any future impacts of the significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions, you could lose your entire investment.

- *Market Volatility Risk:* The net asset value of the Fund will fluctuate based on changes in the value of the equity and fixed income securities and options in which the Fund invests. While the Fund is not designed to be correlated to the markets in general, dramatic or abrupt volatility within the market would negatively impact the Fund's premium collection options strategy. The Fund also invests in securities and derivatives which may be more volatile and carry more risk than some other forms of investment. The price of securities and derivatives may rise or fall because of economic or political changes. Security and derivative prices in general may decline over short or even extended periods of time. Market prices of securities and derivatives in broad market segments may be adversely affected by price trends in commodities, interest rates, exchange rates or other factors wholly unrelated to the value or condition of an issuer.
- *Non-Correlation Risk:* Although the Fund will invest in options on the S&P 500 Index, the Fund is not designed to track the returns of such index. The Fund's return may not match the return of the S&P 500 Index because it is not investing in the equity securities that comprise such index. Also, the Fund incurs operating expenses not applicable to the index, and incurs costs in buying and selling securities.
- *Options Risk:* Volatility in the value of the Fund's option positions could result in significant losses for the Fund. There are risks associated with the sale and purchase of call and put options. Typically the seller (writer) of a covered put option assumes the risk of a decline in the market price of the underlying security below the strike price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option and the buyer of a put or call option, risks losing the entire premium invested in the option if it does not exercise the option. However, the Fund's options strategy utilizes option spreads. The Fund's option strategy's profit potential is limited to the net premium received when entering the trades. The potential for loss is an amount equal to 1) the difference between the strike price of the long put and the strike price of the short put, plus 2) any commissions paid. Maximum loss under the option strategy occurs from the put trade, when the underlying price is less than or equal to the strike price of the short put. There is no guarantee that the Fund's option strategy will generate the types of premium / positive returns which are expected. The Fund's option strategy seeks to retain premiums collected on option contracts, but benefits from the options themselves expiring worthless. In doing so, there is a risk the options may result in a significant loss if the market price moves in a way that was not anticipated, or the adviser closes out an options spread by paying more premium than it collected on the spread.

Also, a portion of the option premiums may be treated as short-term capital gains. It is anticipated that a portion of short-term gains, when distributed to shareholders, are usually taxable as ordinary income, which may have a higher tax rate than long-term capital gains for shareholders holding Fund shares in a taxable account.

- *Underlying Funds Risk:* The Fund invests in Underlying Funds. As a result, your cost of investing in the Fund may be higher than the cost of investing directly in Underlying Funds and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses. In addition, certain prohibitions on the acquisition of mutual fund shares by the Fund may prevent the Fund from allocating investments in the manner the adviser considers optimal. ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. The market value of the ETF shares may differ from their net asset value. Underlying Funds in which the Fund may invest may be subject to different risks, investment strategies and policies than those of the Fund.

Temporary Defensive Positions: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in U.S. Treasury bonds, high-quality short-term debt securities and money market instruments, which may be inconsistent with the Fund's principal investment strategies. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees.

Portfolio Holdings Disclosure: A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information. The Fund may, from time to time, make available month-end portfolio holdings information on the website, www.princetonadaptivepremiumfund.com. If month-end portfolio holdings are posted to the website, they are expected to be at least 60 days old and remain available until new information for the next month is posted. Shareholders may request portfolio holdings schedules at no charge by calling 1-888-868-9501.

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its Net Asset Value; impediments to trading; the inability of the Fund, the adviser and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

Investment Adviser and Portfolio Managers

Princeton Fund Advisors, LLC (the "adviser"), 1580 Lincoln Street, Suite 680 Denver, CO 80203, serves as investment adviser to the Fund. Subject to the oversight of the Board of Trustees, the adviser is responsible for management of the Fund's investment portfolio. The adviser is responsible for selecting appropriate investment strategies, assuring that investments are made according to the Fund's investment objective, policies and restrictions and determining the allocation of Fund assets among the Fund's principal investment strategies. The adviser was established in 2011 for the purpose of advising individuals and institutions. As of June 30, 2024, the adviser had approximately \$925 million in assets under management. Greg D. Anderson, John L. Sabre and Zachary Slater of Princeton are primarily and jointly responsible for the adviser's supervisory role with respect to the Fund.

Pursuant to an advisory agreement between the Trust, on behalf of the Fund, and the adviser, the adviser is entitled to receive, on a monthly basis, an annual advisory fee from each class of shares equal to 1.50% of the Fund's average daily net assets attributable to the relevant share. The Fund's adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least January 31, 2026, to ensure that Total Annual Fund Operating Expenses After Fee Waiver and/or Reimbursement (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with investments including investments in other collective investment vehicles or derivative instruments (for example options fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the adviser)) do not exceed 1.75%, 2.50% and 1.50% for Class A, Class C and Class I shares, respectively; subject to possible recoupment from the Fund in future years (within the three years after the fees were waived or reimbursed) if such recoupment can be achieved within the lesser of the foregoing expense limits or the then-current expense limits. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. For the fiscal period ended April 30, 2024, the Fund paid an investment advisory fee to the adviser at an annual rate of 0.00% of the average daily net assets of the Fund after waivers and reimbursements. A discussion regarding the basis for the Boards' approval of the advisory is available in the Fund's semi-annual report to shareholders dated January 31, 2023.

Greg D. Anderson

Manager and President

Prior to founding Princeton Fund Advisors, LLC in 2011 and certain affiliates, including Mount Yale Capital Group, LLC in 2003 and Mount Yale Asset Management in 1999, Mr. Anderson was a Senior Vice President and Managing Director of Investment Manager Search, Evaluation, and Due Diligence at Portfolio Management Consultants, Inc. Mr. Anderson was previously employed with Deloitte & Touche where he specialized in the areas of estate planning, health care and non-profit organizations, and tax and personal financial planning for high net worth individuals. Mr. Anderson holds a B.A. degree from Hamline University in Minnesota and a J.D. from the University of Minnesota School of Law. Mr. Anderson is a Certified Public Accountant (inactive).

John L. Sabre

Manager and Chief Executive Officer

Prior to founding Princeton Fund Advisors, LLC in 2011 and certain affiliates, including Mount Yale Capital Group, LLC in 2003, Mr. Sabre was a Senior Managing Director at Bear Stearns & Co. and Head of the Mezzanine Capital Group. Mr. Sabre previously served as President of First Dominion Capital, which managed \$3.0 billion of assets and is now owned by Credit Suisse First Boston. Prior to his position at First Dominion Capital, Mr. Sabre was a Managing Director and founding partner of Indosuez Capital, the merchant banking division of Credit Agricole Indosuez. Mr. Sabre holds a B.S. degree from the Carlson School at the University of Minnesota and an M.B.A. degree from the Wharton School at the University of Pennsylvania.

Zachary Slater

Vice President

Mr. Slater joined Princeton Fund Advisors, LLC and its affiliates in 2011 to conduct and oversee research on new investment opportunities. His experience includes evaluating and monitoring traditional, alternative and private investment strategies. Additionally, he has experience transitioning strategies into different investment vehicles. Mr. Slater is responsible for sourcing new managers, conducting due diligence on potential managers and ongoing monitoring of current managers and investments. In addition, he serves as a portfolio manager for Managed Model Portfolios. He holds a B.S. from the Daniels College of Business at the University of Denver.

HOW SHARES ARE PRICED

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of each class of shares is determined as of the close of the New York Stock Exchange (“NYSE”) (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth, National Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees (if any), which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund’s securities are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price (“NOCP”). Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. If market quotations are not readily available, such securities will be valued at fair value as determined using the “fair value” procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security is materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available. The Board has delegated the adviser as its “Valuation Designee” to execute these procedures. The adviser may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Fund may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund’s assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund’s NAV set value is calculated based upon the NAVs of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

Share Classes

This Prospectus describes three classes of shares offered by the Fund. The main differences between the shares classes are the minimum investment, ongoing fees and sales charges. Class A and Class C shares pay an annual fee of 0.25% and 1.00%, respectively, for distribution expenses pursuant to a plan under Rule 12b-1. Class I shares do not pay such fees. For information on ongoing distribution fees, see **Distribution (12b-1) and Shareholder Servicing Fees** on page 20 of this Prospectus. In choosing which class of shares to purchase, you should consider which will be most beneficial to you, given the amount of your purchase. All classes of shares in the Fund represent interest in the same portfolio of investments in the Fund. All share classes may not be available for purchase in all states.

Class A Shares

Class A shares are offered at their public offering price, which is NAV plus the applicable sales charge and is subject to 12b-1 distribution fees of up to 0.25% of the average daily net assets of Class A shares. Over time, these fees paid under the 12b-1 Plan will increase the cost of a Class A shareholder's investment and may cost more than the applicable sales charges. The minimum initial investment in Class A shares of the Fund is \$2,500 for retirement plan accounts and \$2,500 for all other accounts. The minimum subsequent investment in Class A shares of the Fund is \$100 for retirement plan accounts and \$100 for all other accounts. However, the Fund and adviser reserve to right to waive investment minimums for certain types of investors, including current and retired directors and officers of the Fund, the adviser, , their families (e.g., spouse, children, mother or father) and any purchases referred through the adviser; employees of the adviser, or any full-time employee or registered representative of the distributor or of broker-dealers having dealer agreements with the distributor (a "Selling Broker") and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons); or clients of financial intermediaries that have entered into arrangements with the distributor providing for the shares to be used in particular investment products made available to such clients. Currently, there are no such arrangements with any financial intermediaries. The sales charge varies, depending on how much you invest. There are no sales charges on reinvested distributions. The following sales charges, which may be waived at the adviser's discretion, apply to your purchases of Class A shares of the Fund:

Amount Invested	Sales Charge as a % of Offering Price⁽¹⁾	Sales Charge as a % of Amount Invested	Dealer Reallowance⁽²⁾
Under \$25,000	5.75%	6.10%	5.00%
\$25,000 to \$49,999	5.00%	5.26%	4.25%
\$50,000 to \$99,999	4.75%	4.99%	4.00%
\$100,000 to \$249,999	3.75%	3.83%	3.25%
\$250,000 to \$499,999	2.50%	2.56%	2.00%
\$500,000 to \$999,999	2.00%	2.04%	1.75%
\$1,000,000 and above	0.00%	0.00%	0.00%.

(1) Offering price includes the front-end sales load. The sales charge you pay may differ slightly from the amount set forth above because of rounding that occurs in the calculation used to determine your sales charge.

(2) Dealer reallowance is the amount of the sales charge paid to authorized broker-dealers for the sale of Fund shares.

How to Reduce Your Sales Charge

Depending on the amount you invest in Class A shares of the Fund, you may be eligible to purchase Class A shares at a reduced sales charge. To qualify for these reductions, you must notify the Fund's distributor, Northern Lights Distributors, LLC (the "Distributor"), in writing and supply your account number at the time of purchase. You may combine your purchase with those of your "immediate family" (your spouse and your children under the age of 21) for purposes of determining eligibility. If applicable, you will need to provide the account numbers of your spouse and your minor children as well as the ages of your minor children.

Rights of Accumulation: To qualify for the lower sales charge rates that apply to larger purchases of Class A shares, you may combine your new purchases of Class A shares with Class A shares of the Fund that you already own. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the current value of all other Class A shares that you own. The reduced sales charge will apply only to current purchases and must be requested in writing when you buy your shares.

Shares of the Fund held as follows cannot be combined with your current purchase for purposes of reduced sales charges:

- Shares held indirectly through financial intermediaries other than your current purchase broker-dealer (for example, a different broker-dealer, a bank, a separate insurance company account or an investment adviser);
- Shares held through an administrator or trustee/custodian of an Employer Sponsored Retirement Plan (for example, a 401(k) plan) other than employer-sponsored IRAs;
- Shares held directly in the Fund account on which the broker-dealer (financial adviser) of record is different than your current purchase broker-dealer.

Letters of Intent: Under a Letter of Intent (“LOI”), you commit to purchase a specified dollar amount of Class A shares of the Fund, with a minimum of \$25,000, during a 13-month period. At your written request, Class A shares purchases made during the previous 90 days may be included. The amount you agree to purchase determines the initial sales charge you pay. If the full-face amount of the LOI is not invested by the end of the 13-month period, your account will be adjusted to the higher initial sales charge level for the amount actually invested. You are not legally bound by the terms of your LOI to purchase the amount of your shares stated in the LOI. The LOI does, however, authorize the Fund to hold in escrow 5% of the total amount you intend to purchase. If you do not complete the total intended purchase at the end of the 13 month period, the Fund’s transfer agent will redeem the necessary portion of the escrowed shares to make up the difference between the reduced rate sales charge (based on the amount you intended to purchase) and the sales charge that would normally apply (based on the actual amount you purchased).

Repurchase of Class A Shares: If you have redeemed Class A shares of the Fund within the past 120 days, you may repurchase an equivalent amount of Class A shares of the Fund at NAV, without the normal front-end sales charge. In effect, this allows you to reacquire shares that you may have had to redeem, without repaying the front-end sales charge. You may exercise this privilege only once and must notify the Fund that you intend to do so in writing. The Fund must receive your purchase order within 120 days of your redemption. Note that if you reacquire shares through separate installments (e.g., through monthly or quarterly repurchases), the sales charge waiver will only apply to those portions of your repurchase order received within 120 days of your redemption.

Sales Charge Waivers

The sales charge on purchases of Class A shares is waived for certain types of investors, including:

- Current and retired directors and officers of the Fund, the adviser, their families (e.g., spouse, children, mother or father) and any purchases referred through the adviser.
- Employees of the adviser, or any full-time employee or registered representative of the distributor or of broker-dealers having dealer agreements with the distributor (a “Selling Broker”) and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the Fund’s shares and their immediate families.
- Participants in certain “wrap-fee” or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the Distributor.
- Clients of financial intermediaries that have entered into arrangements with the distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisers may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker-dealers that charge a transaction fee and that have entered into agreements with the Distributor (there are currently no such arrangements).
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Employer-sponsored retirement or benefit plans with total plan assets in excess of \$5 million where the plan’s investments in the Fund are part of an omnibus account. A minimum initial investment of \$1 million in the Fund is required. The distributor in its sole discretion may waive these minimum dollar requirements.

The Fund does not waive sales charges for the reinvestment of proceeds from the sale of shares of a different fund where those shares were subject to a front-end sales charge (sometimes called an “NAV transfer”).

Whether a sales charge waiver is available for your retirement plan or charitable account depends upon the policies and procedures of your intermediary. Please consult your financial adviser for further information.

Class C Shares: Class C shares of the Fund are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund. Class C shares pay up to 1.00% on an annualized basis of the average daily net assets as reimbursement or compensation for service and distribution-related activities with respect to the Fund and/or shareholder services, which amount is accrued and paid monthly. Over time, these fees paid under the 12b-1 Plan will increase the cost of a Class C shareholder’s investment and may cost more than other types of sales charges. The minimum initial investment in Class C shares of the Fund is \$2,500 for retirement plan accounts and \$2,500 for all other accounts. The minimum subsequent investment in Class C shares of the Fund is \$100 for retirement plan accounts and \$100 for all other accounts. However, the adviser may waive investment minimums on behalf of the Fund for the type of investors described above.

Class I Shares: Class I shares of the Fund are sold at NAV without an initial sales charge and are not subject to 12b-1 distribution fees, but have a higher minimum initial investment than Class A shares. This means that 100% of your initial investment is placed into shares of the Fund. Class I shares require a minimum initial investment of \$100,000 and minimum subsequent investment of \$100. However, the adviser may waive investment minimums on behalf of the Fund.

Purchasing Shares: You may purchase shares of the Fund by sending a completed application form to the following address:

Via Regular Mail
PRINCETON ADAPTIVE PREMIUM FUND
c/o Ultimus Fund Solutions, LLC
P.O. Box 541150
Omaha, Nebraska 68154

Via Overnight Mail
PRINCETON ADAPTIVE PREMIUM FUND
c/o Ultimus Fund Solutions, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 6822-3474

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Fund's behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various brokers or agents use procedures and impose restrictions that may be in addition to, or different from, those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your broker or agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-888-868-9501 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-888-868-9501 for more information about the Fund's Automatic Investment Plan.

Automated Clearing House (ACH) Purchase: Current shareholders may purchase additional shares via Automated Clearing House ("ACH"). To have this option added to your account, please send a letter to the Fund requesting this option and supply a voided check for the bank account. Only bank accounts held at domestic institutions that are ACH members may be used for these transactions. You may not use ACH transactions for your initial purchase of Fund shares. ACH purchases will be effective at the closing price per share on the business day after the order is placed. The Fund may alter, modify or terminate this purchase option at any time. Shares purchased by ACH will not be available for redemption until the transactions have cleared. Shares purchased via ACH transfer may take up to 15 days to clear.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a wire transfer or a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to "Princeton Premium Fund." The Fund will not accept payment in cash, cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Ultimus Fund Solutions, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check or electronic payment returned to the transfer agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern Time) on a day the NYSE is open (each a "business day") will be processed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. "Good order" means your purchase request includes:

- the name of the Fund and share class
- the dollar amount of shares to be purchased
- a completed purchase application or investment stub
- check payable to the "Princeton Adaptive Premium Fund"

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-888-868-9501 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: The Fund typically expects that it will take up to 7 days following the receipt of your redemption request to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of Fund shares, any line of credit, and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions.

You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

Via Regular Mail
PRINCETON ADAPTIVE PREMIUM FUND
c/o Ultimus Fund Solutions, LLC
P.O. Box 541150
Omaha, Nebraska 68154

Via Overnight Mail
PRINCETON ADAPTIVE PREMIUM FUND
c/o Ultimus Fund Solutions, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022-3474

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account. If you own an IRA, you will be asked whether or not the Fund should withhold federal income tax.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-888-868-9501.

During periods of high market activity, you may encounter higher than usual wait times. Please allow sufficient time to ensure that you will be able to complete your telephone transaction prior to market close. Neither the Fund nor its transfer agent will be held liable if you are unable to place your trade due to high call volume.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Systematic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Systematic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$100 on specified days of each month into your established bank account. Please contact the Fund at 1-888-868-9501 for more information about the Fund's Systematic Withdrawal Plan.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities ("redemption in kind") if the amount is greater than the lesser of \$250,000 or 1% of the Fund's assets. To the extent feasible, the Fund expects that a redemption in kind would be a pro rate allocation of the Fund's portfolio. The securities will be chosen by the Fund and valued under the Fund's net asset value procedures. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses such as brokerage fees or taxes in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in “good order” as described below, it will issue a check based on the next determined NAV following your redemption request. However, under the 1940 Act, a shareholder’s right to redeem shares and to receive payment therefore may be suspended at times (a) when the NYSE is closed, other than customary weekend and holiday; (b) when trading on that exchange is restricted for any reason; (c) when an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund fairly to determine the value of its net assets, provided that applicable rules and regulations of the Securities and Exchange Commission (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or (d) when the Securities and Exchange Commission by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption. In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension. If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank (usually within 10 days of the purchase date).

Good Order: Your redemption request will be processed if it is in “good order.” To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance in the Fund falls below the share class minimum, the Fund may notify you that, unless the account is brought up to at least the minimum within 60 days of the notice your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below the share class minimum due to a decline in NAV.

Inactive Accounts: If shareholder-initiated contact does not occur on your account within the timeframe specified by the law in your state of record, or if Fund mailings are returned as undeliverable during that timeframe, the assets of your account (shares and/or any uncashed checks) may be transferred to your last known recorded state of residence as unclaimed property, in accordance with specific state law.

NOTE: If you fail to initiate such contact, your property will be escheated to your last known state of residency after which you will need to claim the property from that state.

An account may be turned over as unclaimed property to the investor’s last known state of tax residence if the account is deemed “inactive” or “lost” during the time frame specified within the applicable state’s unclaimed property laws. Investors who are residents of the state of Texas may designate a representative to receive legislatively required unclaimed property due diligence notifications. A Texas Designation of Representative Form is available for making such an election.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Board has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing, including committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy", including rejecting or limiting specific purchase requests and rejecting purchase requests from certain investors.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders. Due to the subjective nature of these methods, it is possible that the Fund may not be able to identify or limit all market timing activities. Generally exchange activity is considered excessive if shares of the Fund are exchanged or redeemed within seven calendar days of purchase or exchange activity exceeds 1% of the NAV of the Fund.

Based on the frequency of redemptions in your account, the adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to reject or limit the amount, number, frequency or method for requesting future purchases or exchanges into the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the adviser will be liable for any losses resulting from rejected purchase orders. The Fund may also bar an investor who has violated these policies (and the investor's financial adviser) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. The risk also exists that because such methods are inherently subjective, the discretionary application of the Fund's response to potential market timing actions may not be uniformly applied. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale or exchange of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares, you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gains at least annually. From time to time, the Fund may make quarterly distributions of short-term capital gains. Certain distributions may be deemed a return of capital. All distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant.

Distribution Policy

The Fund generally distributes to shareholders substantially all of its net income (which includes, for example, interest and dividends) as well as substantially all of its net capital gains (that is, long-term capital gains from the sale of portfolio securities and short-term capital gains from both the sale of portfolio securities). In addition, pursuant to its distribution policy, the Fund may make distributions that are treated as a return of capital. Return of capital is the portion of a distribution that is the return of your original investment dollars in the Fund. A return of capital is not taxable to a shareholder unless it exceeds a shareholder's tax basis in the shares.

The Fund has adopted a policy (which may be modified at any time by its Board) to pay quarterly distributions on Fund shares at a target rate that represents an annualized payout of approximately 2.0% on the Fund's per-share net asset value on the date of a distribution's declaration. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital (i.e. from your original investment). Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares.

Returns of capital reduce a shareholder's tax cost (or "tax basis"). Once a shareholder's tax basis is reduced to zero, any further return of capital would be taxable. As required under the 1940 Act, the Fund will provide a notice to shareholders at the time of distribution when such distribution does not consist solely of net income. Additionally, each distribution payment will be accompanied by a written statement which discloses the source or sources of each distribution. The IRS requires you to report these amounts, excluding returns of capital, on your income tax return for the year declared. The Fund will provide disclosures, with each distribution, that estimate the percentages of the current and year-to-date distributions that represent (1) net investment income, (2) qualified dividends, (3) capital gains and (4) return of capital. At the end of the year, the Fund may be required under applicable law to re-characterize distributions made previously during that year among (1) ordinary income, (2) capital gains and (3) return of capital for tax purposes. An additional distribution may be made in December, and other additional distributions may be made with respect to a particular fiscal year in order to comply with applicable law. Distributions declared in December, if paid to shareholders by the end of January, are treated for federal income tax purposes as if received in December.

Your redemptions, including exchanges, may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

The Fund must report to the IRS and furnish to shareholders the cost basis information for shares purchased and sold. The Fund has chosen average cost as its standing (default) tax lot identification method for all shareholders, which means this is the method the Fund will use to determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing NAVs, and the entire position is not sold at one time. Shareholders may, however, choose a method other than the Fund's standing method at the time of their purchase or upon sale of covered shares. Shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Distribution (12b-1) and Shareholder Servicing Fees: The Trust, with respect to the Fund, has adopted the Trust's Master Distribution and Shareholder Servicing Plans ("12b-1 Plans" or "Plans") for Class A and Class C shares, pursuant to which the Fund may pay the Fund's distributor an annual fee for distribution and shareholder servicing expenses of 0.25% and 1.00% of the Fund's average daily net assets attributable to Class A shares and Class C shares, respectively.

The Distributor and other entities are paid under the Plans for services provided and the expenses borne by the Distributor and others in the distribution of Fund shares, including the payment of commissions for sales of the shares and incentive compensation to and expenses of dealers and others who engage in or support distribution of shares or who service shareholder accounts, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund's shares to other than current shareholders; and preparation, printing and distribution of sales literature and advertising materials. In addition, the Distributor or other entities may utilize fees paid pursuant to the Plans to compensate dealers or other entities for their opportunity costs in advancing such amounts, which compensation would be in the form of a carrying charge on any un-reimbursed expenses.

You should be aware that if you hold your shares for a substantial period of time, you may indirectly pay more than the economic equivalent of the maximum front-end sales charge allowed by the FINRA due to the recurring nature of distribution (12b-1) fees.

Additional Compensation to Financial Intermediaries: The Distributor, the adviser and each of their affiliates, or other Fund affiliates may each, at its own expense and out of its own assets including its legitimate profits from Fund-related activities, provide additional cash payments, travel or other expense reimbursements to financial intermediaries who sell shares of the Fund or assist in the marketing of the Fund, including placement agents and marketing specialists. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, conference sponsorships, costs or expenses of attending adviser-sponsored due diligence conferences, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The Distributor may, from time to time, provide promotional incentives to certain investment firms. Such incentives may, at the distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional compensation.

Householding: To reduce expenses, the Fund mails only one copy of a Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-888-868-9501 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance for the periods of the Fund's operations since inception. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information for the Fund has been derived from the financial statements audited by RSM US LLP, whose report, along with the Fund's financial statements, are included in the Fund's April 30, 2024 Annual Report, which is available upon request.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Period

Class A	April 30, 2024	April 30, 2023⁽¹⁾
Net asset value, beginning of period	\$ 10.08	\$ 10.00
Activity from investment operations:		
Net investment income ⁽²⁾	0.07	0.06
Net realized and unrealized gain on investments and options written	0.42	0.18
Total from investment operations	0.49	0.24
Less distributions from:		
Net investment income	(0.22)	(0.11)
Net realized gains	(0.25)	(0.05)
Total distributions	(0.47)	(0.16)
Net asset value, end of period	\$ 10.10	\$ 10.08
Total return ⁽³⁾	4.94%	2.44% ⁽⁶⁾
Net assets, at end of period ⁽⁹⁾	\$ 107	\$ 103
Ratio of gross expenses to average net assets ⁽⁴⁾⁽⁵⁾	15.01% ⁽⁸⁾	88.13% ⁽⁷⁾
Ratio of net expenses to average net assets ⁽⁵⁾	2.91% ⁽⁸⁾	2.62% ⁽⁷⁾
Ratio of net investment income to average net assets ⁽⁵⁾	2.13%	1.15%
Portfolio Turnover Rate	0%	0% ⁽⁶⁾

(1) The Princeton Adaptive Premium Fund Class A shares commenced operations on September 23, 2022.

(2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(3) Total returns shown assume changes in share price and reinvestment of dividends and capital gain distributions. Had the Advisor not waived a portion of its fees, total returns would have been lower.

(4) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.

(5) Annualized for periods less than one full year.

(6) Not annualized.

(7) Includes 0.87% for the period ended April 30, 2023 attributed to margin expense on short sales, which are not subject to waiver by the Advisor.

(8) Includes 1.16% for the period ended April 30, 2024 attributed to margin expense on short sales and line of credit expense which are not subject to waiver by the Advisor.

(9) Actual net assets, not truncated.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Period

Class I	Year Ended April 30, 2024	Period Ended April 30, 2023⁽¹⁾
Net asset value, beginning of period	\$ 10.10	\$ 10.00
Activity from investment operations:		
Net investment income ⁽²⁾	0.24	0.09
Net realized and unrealized gain on investments and options written	0.39	0.17
Total from investment operations	0.63	0.26
Less distributions from:		
Net investment income	(0.22)	(0.11)
Net realized gains	(0.25)	(0.05)
Total distributions	(0.47)	(0.16)
Net asset value, end of period	\$ 10.26	\$ 10.10
Total return ⁽³⁾	6.34%	2.65% ⁽⁶⁾

-
- (1) The Princeton Adaptive Premium Fund Class I shares commenced operations on September 23, 2022.
 - (2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.
 - (3) Total returns shown assume changes in share price and reinvestment of dividends and capital gain distributions. Had the Advisor not waived a portion of its fees, total returns would have been lower.
 - (4) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.
 - (5) Annualized for periods less than one full year.
 - (6) Not annualized.
 - (7) Includes 0.87% for the period ended April 30, 2023 attributed to margin expense on short sales, which are not subject to waiver by the Advisor.
 - (8) Includes 1.16% for the period ended April 30, 2024 attributed to margin expense on short sales and line of credit expense which are not subject to waiver by the Advisor.

PRIVACY NOTICE

Rev. April 2021

FACTS WHAT DOES NORTHERN LIGHTS FUND TRUST DO WITH YOUR PERSONAL INFORMATION?

Why? Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What? The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- Social Security number
- Assets
- Retirement Assets
- Transaction History
- Checking Account Information
- Purchase History
- Account Balances
- Account Transactions
- Wire Transfer Instructions

When you are *no longer* our customer, we continue to share your information as described in this notice.

How? All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Northern Lights Fund Trust chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Northern Lights Fund Trust share?	Can you limit this sharing?
For our everyday business purposes – such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes – to offer our products and services to you	No	We don't share
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes – information about your transactions and experiences	No	We don't share
For our affiliates' everyday business purposes – information about your creditworthiness	No	We don't share
For nonaffiliates to market to you	No	We don't share

Questions? Call (631) 490-4300

Who we are

Who is providing this notice? Northern Lights Fund Trust

What we do

How does Northern Lights Fund Trust protect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.

Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information.

How does Northern Lights Fund Trust collect my personal information? We collect your personal information, for example, when you

- Open an account
- Provide account information
- Give us your contact information
- Make deposits or withdrawals from your account
- Make a wire transfer
- Tell us where to send the money
- Tells us who receives the money
- Show your government-issued ID
- Show your driver's license

We also collect your personal information from other companies.

Why can't I limit all sharing? Federal law gives you the right to limit only

- Sharing for affiliates' everyday business purposes – information about your creditworthiness
- Affiliates from using your information to market to you
- Sharing for nonaffiliates to market to you

State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates Companies related by common ownership or control. They can be financial and nonfinancial companies.

- *Northern Lights Fund Trust doesn't share with our affiliates.*

Nonaffiliates Companies not related by common ownership or control. They can be financial and nonfinancial companies.

- *Northern Lights Fund Trust does not share with nonaffiliates so they can market to you.*

Joint marketing A formal agreement between nonaffiliated financial companies that together market financial products or services to you.

- *Northern Lights Fund Trust doesn't jointly market.*
